

Reflektive Release Notes

Reflektive Q4 2025

Introduction

We are pleased to announce the Q4 2025 update of Reflektive. This document provides information about issues resolved in this update.

Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

Revision Information	
Revision Date:	August 07, 2026
Revised Document Version Number:	1.0
Details of Revision:	Initial Version

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

Zendesk Ticket IDs	Internal ID	Issue Title	Issue and Resolution Details
N/A	PUL-33413	Engagement Survey Favorability Breakdown Percentage Mismatch in New PI vs Classic PI	New PI's Favorability Breakdown report was including null/unanswered responses in its favorability percentage denominator, causing it to diverge from the Overall Engagement report and from Classic PI. The calculation was updated to exclude null/unanswered values, aligning New PI's Favorability Breakdown with Overall Engagement and with
N/A	PUL-33422	Dashboard Save Failure with Large Filter Selections	Resolved an issue where saving a dashboard with a filter containing many selected values (e.g., 33+ employees) could fail with a Request-URI Too Large error. The save dashboard endpoint was changed

			from GET to POST so filter and widget data is sent in the request body instead of the URL, a loading indicator was added to the Save button, and a related issue causing widget configuration to save as null instead of an empty list when creating a new dashboard was also fixed.
N/A	PUL-33427	Classic PI Response Rate and Missing Survey Responses Due to Soft-Deleted Record Filtering	Fixed an issue where Classic Performance Insights incorrectly excluded soft-destroyed survey response records by default, causing response rate percentages and previously submitted responses to appear missing or inconsistent compared to New PI. Reporting logic was updated so admins retain visibility into all previously submitted survey responses, including those for terminated employees.
N/A	PUL-33436		Request Feedback email notification produces malformed subject/body when a title is present
