

Reflektive Release Notes

Reflektive Q2 2026

Introduction

We are pleased to announce the Q2 2026 update of Reflektive. This document provides information about issues resolved in this update.

Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

Revision Information	
Revision Date:	August 07, 2026
Revised Document Version Number:	1.0
Details of Revision:	Initial Version

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

Zendesk Ticket IDs	Internal ID	Issue Title	Issue and Resolution Details
N/A	PUL-33166	Orphaned Key Results Cannot Be Deleted After Parent Goal Deletion When Category Is Not Set	Fixed the goal-deletion cascade so that key results are always deleted along with their parent goal, regardless of whether the goal's Category field is populated, eliminating the orphaned key results that previously blocked deletion.
N/A	PUL-33176	New PI Reporting KPIs Added for Recognition Module — Count of Unique Employees Sending/Receiving Feedback	Added two new KPIs to the New PI reporting module for the Recognition feature — "Count of Unique Employees Sending Feedback" and "Count of Unique Employees Receiving Feedback" — mirroring the existing Feedback module KPIs. These report the count of distinct employees participating in Recognition sending/receiving activity and surface

			automatically in the PI measure picker.
N/A	PUL-33584	Broken support article link in review check-in fixed	The hardcoded link to a support article shown in the "No feedback is eligible to share" message on review check-ins pointed to a deleted article URL. The link has been updated to point to a valid, current support article.
412879	PUL-33641	Manager Reassignment No Longer Overwrites Former Manager's Submitted Review Feedback	Fixed an issue in the manager reassignment process where the new manager was not passed correctly, preventing the new manager's review record from being created and existing feedback from being copied forward; this could result in the "one review for all managers" sync propagating an empty review form and overwriting the former manager's already-submitted ratings and comments. The reassignment flow now passes the new manager correctly, ensuring review records are created properly and prior feedback is preserved rather than overwritten.
412287,412765	PUL-33645	HRIS Sync Deadlock During Manager Reassignment	Resolved a database deadlock that occurred when an HRIS import and a concurrently-running background job both updated reviewing question relations during manager reassignment, causing the entire HRIS sync import to fail and roll back. Row locks are now acquired in a consistent order across all update paths, eliminating the conflict.
